PROFESSIONAL SUMMARY

Computer Science graduate specializing in Artificial Intelligence, Machine Learning, and Software Engineering with hands-on experience in building intelligent applications, scalable REST APIs, and production-oriented AI systems using modern software engineering practices.

EDUCATION

ITER, Siksha 'O' Anusandhan (SOA) University

Bachelor of Technology (B.Tech), Computer Science & Engineering

2022 – 2026

CGPA: 9.33 / 10

Kendriya Vidyalaya Berhampur

Senior Secondary (CBSE - Class XII)

2021

Percentage: 93.66%

Kendriya Vidyalaya Berhampur

Secondary (CBSE - Class X)

2019

Percentage: 93.80%

PROJECTS

AI Health Companion (B.Tech Capstone Project) | Python, FastAPI, Streamlit, TensorFlow, XGBoost, LightGBM, SQLite

- Designed and developed a hybrid AI-based preventive healthcare platform as the final-year B.Tech capstone project, integrating Machine Learning, Deep Learning, and LLM-based interpretation for disease risk prediction, wellness analytics, and personalized healthcare insights.
- Engineered a modular full-stack architecture using FastAPI, Streamlit, TensorFlow, XGBoost, LightGBM, SQLite, and REST APIs featuring authentication, interactive dashboards, AI-driven interpretation, and automated PDF reporting.

Fine-Tuned LLM for Academic Question Answering | PyTorch, Hugging Face, FLAN-T5

- Fine-tuned FLAN-T5 using Hugging Face Transformers and PyTorch for structured academic question answering.
- Developed preprocessing, tokenization, and optimized training pipelines for instruction-tuned large language models.

Deep Learning-Based Bitcoin Price Forecasting | TensorFlow, LSTM, CNN, N-BEATS

- Developed Dense Networks, LSTM, CNN (Conv1D), and N-BEATS architectures for multistep Bitcoin price forecasting using historical financial time-series data.
- Implemented feature engineering, sliding-window generation, chronological train-test splitting, and evaluation using MAE, RMSE, and MAPE.

AgriTech Platform | JPMorgan Chase Code for Good Hackathon

- Collaborated within a cross-functional Agile team to design and develop a prototype AgriTech platform addressing operational requirements provided by NGO CML during the JPMorgan Chase Code for Good Hackathon.
- Implemented backend services including REST APIs, authentication, Razorpay payment integration, chatbot functionality, and real-time communication following modern software engineering practices.

SKILLS

Programming Languages: Python, Java, JavaScript, C/C++

Artificial Intelligence: Machine Learning, Deep Learning, Large Language Models (LLMs), Natural Language Processing (NLP), Computer Vision, Generative AI, AI Agents

Frameworks & Libraries: TensorFlow, PyTorch, Hugging Face Transformers, Scikit-learn, XGBoost, LightGBM

Backend Development: FastAPI, Django, Node.js, Express.js, REST APIs

Frontend Development: React.js, HTML, CSS, Streamlit

Databases: MySQL, MongoDB, SQLite, SQLAlchemy

Cloud & Developer Tools: AWS (Fundamentals), Git, GitHub, Postman, Firebase, Cloudinary, VS Code, Google Colab

Soft Skills: Problem Solving, Teamwork, Communication, Adaptability

CERTIFICATIONS

TensorFlow for Deep Learning Bootcamp <i>Udemy</i>	2026
Python for Machine Learning & Data Science Masterclass <i>Udemy</i>	2025
Code for Good Hackathon Participant <i>JPMorgan Chase & Co.</i>	2025
Adobe & NITI Aayog Student Mentorship Program <i>Atal Innovation Mission</i>	2020

PERSONAL DETAILS

Full Name: Subhankar Pandit

Father's Name: Sailendra Narayana Pandit

Father's Occupation: Section Engineer, Indian Railways

Mother's Name: Geetanjali Pandit

Mother's Occupation: Homemaker

Date of Birth: 19 November 2002

Gender: Male

Nationality: Indian

Category: General

Languages Known: English, Hindi, Odia

Current Address: Keshab nagar lane 4, Lanjipalli, Berhampur, Odisha, India

Permanent Address: Keshab nagar lane 4, Lanjipalli, Berhampur, Odisha, India
